

## Providing caring, customized support ...

Anne Carlsen Center (ACC) provides an array of specialized services to individuals with complex and multiple impairments including medical fragility and Autism Spectrum Disorder. Professionals with years of experience provide customized support to children and young adults with disabilities, families, and schools to assist support personnel in developing well-rounded and effective community-based programs to ensure successful outcomes.

### *ACC Evaluation Specialties:*

- **Multiple Disabilities**
- **Autism Spectrum Disorder**
- **Vocational Services**

## A holistic approach ...

We enlist the talents of a comprehensive team of professionals to help each child and young adult we serve enjoy the greatest level of independence. The evaluation team begins by assessing each individual's abilities and needs. Following a thorough assessment, we develop detailed recommendations, taking into account a variety of environments including home, school and community, as well as recreation and vocational activities.

## Reaching Out & Touching Lives

The Anne Carlsen Center equips and empowers individuals of a variety of ages to lead lives of greater independence. As part of that mission, the Center's highly-trained staff provides assessments in home, school and community settings.

All those who share in supporting each child or young adult with disabilities are strongly encouraged to participate in the assessments through intake meetings, observation of the evaluation, and participation in follow-up meetings in order to be able to fully carry out recommendations.

ACC staff will—based on the assessment choices—provide a schedule of how each evaluation will be administered.

### Recommendations

A professional team assessment may be conducted in the areas of:

- Alternative Augmentative Communication
